### **DETAILED ACTION**

Claims 1-14 are pending. Claims 11-14 are new. Claims 4-10 are withdrawn herein to non-elected subject matter. The current amendment to the claims and addition of new claims has necessitated a new species election requirement pertaining to Claims 1-3 and 11-14.

#### ***Election/Restrictions***

Applicant's election without traverse of Group I (i.e. Claims 1-3) in the reply filed on 1 July 2009 is acknowledged. It is noted that newly added Claims 10-14 are being included in the elected invention Group I, herein.

Claims 4-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1 July 2009.

#### ***New Species Election requirement***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

**-Applicant must elect** only one type of mammalian cells selected from the group consisting of: U937, NSO, CHO, fibroblasts, hybridoma cell, myeloma cells and cellular assemblies (Corresponding to Claim 13).

**-In addition, if Applicant elects** cellular assemblies, Applicant must further elect only one type of cellular assembly from between embryos and pancreatic cells (Corresponding to Claim 14).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. **If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).**

The following claim(s) are generic: Claim 1.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species lack the same or corresponding special technical features because the species are different cell types that are mutually exclusive of each other.

A telephone call was made to Attorney W. Murray Spruill on 28 August 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
